BUSINESS INSIGHTS REPORT

Marketing Campaign Analysis | 220 campaigns | 5 marketing channels

TOTAL IMPRESSIONS	TOTAL CLICKS	TOTAL CONVERSIONS	OVERALL CTR	CLICK-TO-CONVERSION
641.19M	4.79M	263,224	0.75%	5.49%

KEY CHANNEL FINDINGS

• **Email:** strongest measured efficiency — ROI 7,612.39% and lowest CPA (■35.54).

• **Google Ads:** highest conversion volume (117,940) and ROI 3,303.12%.

• **Social Media:** 81,903 conversions and ROI 1,832.78%.

• **TV:** ROI 37.86% with CPA ■1,164.79.

• **Radio:** lowest ROI (0.94%) and highest CPA (■1,197.57).

RECOMMENDED TEST BUDGET

Channel	Suggested share
Email	40%
Google Ads	30%
Social Media	25%
TV	4%
Radio	1%

Treat this as a controlled test allocation, not a permanent budget rule. Reassess using real campaign results, audience reach, and business objectives.

BUSINESS RECOMMENDATIONS

• Prioritize Email, Google Ads, and Social Media for the next test cycle.

• Improve ad creative, targeting, and landing pages to raise the 0.75% overall CTR.

• Run limited TV and Radio experiments only where they support reach or brand objectives; track incremental conversions.

DATA & METHOD NOTE

Dataset is synthetic/educational. Missing numeric values were imputed with channel-level medians; duplicates were removed. ROI = (revenue – advertising spend) / advertising spend × 100. This is an advertising-spend return measure, not full accounting profit; other operating costs are excluded. Imputed values and unusually high returns should be validated against real campaign records.
